EarthChoice™ SmartLock® Hinged Lid Containers

PP (0°F/18°C - 250°F/121°C)

These guidelines are supplied to assist you in determining the proper use of Pactiv products. They are based upon testing and published guidelines and are reliable in most applications. However, because every food supplier's recipes, ingredients, processes and supply chain is unique, these guidelines are not a substitute for product testing. Confirmation of product acceptability under your specific conditions of use must be done by you.

Social responsibility, respect and care for the environment require action today while keeping an eye on the future. Pactiv has developed a new line of "to-go" hinged lid containers that captures the latest innovations in hybrid materials. EarthChoice™ SmartLock® hinged lid containers are made from Talc-Filled Polypropylene which contains on average 40% less plastic polymers than standard polypropylene containers. This hybrid material is microwaveable up to 250 degrees F (121 degrees C) and is ideal for your hot food take-out menu items. These sturdy hinged lids are available in five popular sizes to fit any size "to-go" applications.
