BioPlus TERRA® II

Bio-Plus® Terra II is the next generation in compostable foodservice packaging from the industry innovation leader Fold-Pak. Bio-Plus Terra II still uses recycled kraft paperboard but replaces PLA lining found in Bio-Plus Terra utilizing Cascades Sonoco's FlexSHIELD™ coating technology. Bio-Plus Terra II is third party certified (BNQ) compostable in commercial composting setting and offers a more economical compostable packaging solution. Bio-Plus® Terra II can be used in hot, cold, wet and dry foodservice applications and will help keep foods better by retaining heat while allowing steam to vent from the container during transport. Bio-Plus® Terra II is microwave safe for re-heating. Another step in the evolution of sustainable foodservice packaging!

- Bio-Plus® Terra II is certified compostable by BNQ - www.bnq.qc.ca
- Bio-Plus® Terra II is Cedar Grove conditionally accepted - see accepted product list at www.cedar-grove.com
- Bio-Plus® Terra II is endorsed by the Green Restaurant Association (GRA) and states so on the container - customers want to know
- Custom printing available - all printing done using FDA compliant, environmentally responsible water based inks
- Bio-Plus® Terra II take-out / to go packaging offers a gift box for your customer - an image supporting your foodservice establishment

SUSTAINABLE PACKAGING

Consumer demand for sustainable packaging solutions continues to grow. Bio-Plus® Terra II containers are made from 100% recycled paper (minimum 90% post consumer content). Each Bio-Plus® Terra II container includes a sustainability message on the bottom that will assure your customers that you are using sustainable packaging. There is also a website referenced that will give your customers additional information about the packaging materials and how they can be recycled. Additionally, Bio-Plus® Terra II containers are endorsed by the Green Restaurant Association and display their logo on the package.
