Clear-seal™ Film

CLEAR-SEAL™ HIGH-BARRIER ROLLSTOCK FROM BERRY PLASTICS

Keeps moisture in, oxygen out for extended shelf life.

Puncture and abrasion resistant materials reduce leakers and returns during handling and distribution.

Clear-seal offers optimum clarity for maximum merchandising appeal.

Select from three basic coextruded or laminated multi-layer constructions, employing formable and non forming films, with Easy Open features for consumer convenience.

Dual forming materials for Easy Open tight package presentation.

Product presentation through crystal clear forming web.

Tight product presentation through clear forming web.

COEXTRUDED FILMS

FORMING FILMS

Clear-seal™ high-barrier coextruded forming films are for use in vacuum or modified atmosphere packaging applications such as: Retail and food service applications, deep or shallow draw, Easy Open and reclosable packages requiring clarity and durability.

- Clear-seal™ offers exceptional clarity with color-fade protection for attractive, appetizing product presentation.
- Excellent forming properties.
- High heat resistance.
- Optimal slip characteristics for high-speed machine productivity.
- Excellent oxygen barrier and moisture vapor transmission rate (MVTR) with maximum wall and corner thickness.
- Superior puncture and abrasion resistance offer added protection through transit and in-store handling.
- Available in a variety of gauges to meet your application requirements.
- Snap-back or memory retention film blends.

Memory retention clear forming films for ideal product presentation.

Forming web material blends provides lay flat package presentation.

NON-FORMING FILMS

Berry Plastics' Clear-seal high-barrier coextruded non forming films are flat, highly machineable rolls for use with flexible and rigid forming films, preformed trays or tubs. These films are a perfect substrate for labeled products or surface printed designs with over lacquer print protection.

- Offering variety of sealant options to meet your application requirements.
- Easy Open or Fusion Seal options.
- Peel strength can be engineered for specific customer and package requirements.
- Superior machine ability for maximum processing efficiencies.
- Available in a variety of gauges to meet your application requirements.

Crystal Clear Coex non forming films for product labeling.

Coex non forming films for online printing.

Crystal Clear Coex non forming films for product labeling.

Crystal Clear Coex Open tub lidding films.

LAMINATE FILMS

Clear-seal™ high barrier laminate film seals readily to flexible or rigid forming rollstock. It can also be utilized as a lidding film for preformed trays and tubs. These high-clarity laminate films allow for reverse printing up to 10 colors for maximum brand appeal and product visibility.

- Engineered to meet specified oxygen barrier and MVTR requirements
- Easy Open or Fusion Seal options
- Reliable, leak-free seal integrity
- Excellent puncture and abrasion resistance offers protection during handling and distribution.
- The proprietary formulation ensures maximum machine efficiency and lower processing costs in horizontal thermoforming applications. The highly effective sealant options provide clean and consistent sealing for high speed production.
- Sealability. Clean, efficient sealing enables high speed production.
- Superior machineability for maximum processing efficiencies.
- Available in a variety of gauges to meet your application requirements.

Easy Open and easy to cut printed films for automated in line die cutting applications

KEY APPLICATIONS BY PRODUCT CATEGORY

MEAT

Retail, deli and bulk food service lunchmeats

Sausages

Franks

Bacon

Jerky

Pepperoni

Poultry Products

Pegged shingled meats and dry products

* Non-forming Coextruded & Laminate films only

CHEESE

Natural chunk

Sliced

Processed

Specialty Crumbles

Logs

Cheese Balls

Pegged and shingled cheeses

Single serve or multi-pack string and snack cheese

Lidding Films for cheese products

Cheese loaves

Lidding- semi-rigid tubs/trays*

OTHER

Poultry products

Raw and pre-cooked bacon

Bone in products

Fresh bakery dough

Easy Open printed films for multi serve packages.

Flexo and process printing for communications of product and brand attributes.

Multi-color graphics and high-strength Fusion seals provide product integrity.

High-quality reverse printed line and process graphics.

Multi-color process printing with clear window for demonstrating product quality.

TOTAL SYSTEMS APPROACH

Berry Plastics is a leader in the food packaging industry. We offer world class technical support in food science, plastics technology, and in your plant.

Our ISO- and AIB-certified manufacturing facilities assure quick response by providing customers with innovative products, packaging expertise and operational excellence. Pre-qualification of materials using advanced pilot line extrusion ensure optimized "speed to market".

STATE OF THE ART GRAPHICS

Berry Plastics' state of the art Global Graphics Center. Offering every service from proofing to commercial print, Berry Plastics converts your unique look quickly and efficiently. Ten color, flexographic printing delivers superior print quality.
