# Hot/Cold Bowls & Lids

## FEATURES AND BENEFITS

- C-Fine® is D&W's proprietary (PS) material that is made from a patented process of air, water and pressure, to create a unique structure without the use of CFC blowing agents.
- Most notably, the patented process reduces the use of oil-based resin by approximately 30% while delivering the same great performance attributes when compared to a similar product made from traditional Polystyrene.
- The product design offers insulating properties that maintain the right temperature for both hot and cold foods while keeping the container comfortable to hold.
- The process creates a thin wall, which is light weight and translates into low cube reducing transportation costs. Your customers get a package that is cut-resistant, while providing excellent oil and fatty food barriers.
