

SINCE 1925

KEYSTONE[®]

ADJUSTABLE CAP COMPANY, INC.

*Protecting
Industry Workforce*

Your Success is Our Success

In 1925, Keystone Adjustable Cap revolutionized the food service industry with the design and manufacture of the world's first disposable paper caps. Today, our line has grown to well over one hundred items with production capacities for custom-made products.

Since 1925, we have held steadfast to our beliefs of integrity, product quality, competitive pricing, and unsurpassed service. We maintain the highest business ethics in partnerships with our distributors. This confidence and respect has led to our continued growth and success. Our staff has a vested interest in satisfying our clients. That is why you'll find them to be knowledgeable, courteous and efficient in processing your requests – no voicemail, no anonymous person on the other end of the line – a representative whose name you know and who cares about your business. After all, your success is our success.

*If you are currently a client-partner of Keystone Adjustable Cap, we would like to thank you for sharing your confidence and support over the years. If you are a prospective customer, we would like to invite you into our Keystone family. **Let us help you make your business grow.***

Material Descriptions

Polypropylene

Spun bonded polypropylene is a lightweight, breathable fabric that provides economical protection against non-hazardous, grimy-work environment applications. It is the best low cost solution for protecting workers against

dry particulates, dirt and grime. Spun bonded polypropylene is appropriate for wear in the non-toxic workplace and is a low-cost solution for protecting workers in dirty environments.

Laminated Polypropylene

Coated polypropylene has the added benefit of a solid sheet of polyethylene bonded to the surface providing protection where liquid splash is a concern. The polyethylene film is impervious and non-linting with great

tensile strength. Great for pesticide spraying, asbestos and mold remediation, painting, light acid splash protection, and any wet general maintenance areas. An economical solution for light non-hazardous splash protection.

SMS

SMS barrier fabric is a unique tri-laminate construction that offers a high tensile strength and toughness that is also soft, drapable, and easy to work with. This material offers excellent barrier protection while keeping the

worker cool and comfortable. SMS provides a fluid and particulate barrier to protect the worker without sacrificing mobility and comfort. Garments constructed of SMS fabric are strong and durable, yet offer outstanding comfort, breathability, softness, and wearability. SMS is lightweight and resistant to tears and punctures.

Tyvek®

Tyvek® is a spun bonded olefin fabric that is made from high density polyethylene fibers that offer unique qualities of excellent barrier protection and strength. Tyvek® is lightweight and highly resistant to tears and punctures.

Spun bonded Olefin is strong, lightweight, flexible, smooth, low-linting, opaque and resistant to water and chemicals. The unique low-linting properties, combined with the barrier properties, make Tyvek® garments an excellent choice for Cleanroom apparel in pharmaceutical manufacture and electronic device assembly.

KEYGUARD®

Keyguard Fabric is a **new** cost savings alternative to Tyvek® that provides the worker with outstanding protection, durability, and comfort. Keyguard is a microporous polyolefin fabric that is very effective everywhere Tyvek® is used.

Keystone Adjustable Cap Co., Inc.

Customer Service

Our customer service representatives are the best trained and most knowledgeable in the industry.

Website

View the Keystone catalogue online: locate sales reps, shipment tracking and technical information.

www.keystonecap.com

Bar Coding + EDI

Keystone offers bar coded packaging as part of our commitment to be the most service oriented company of Disposable Protective Wear. We also offer Electronic Data Interchange to our customers.

Shipping

Keystone ships from our warehouses in Pennsauken, NJ; Los Angeles, CA; and Miami, FL.

Outside Sales Reps

Keystone has highly knowledgeable representatives throughout the country to increase distributor presence at the end user level. These professionals will conduct training for distributor personnel by using training packages, conducting sight surveys at end user locations, and assisting in identification of competitive products. They will help to create customized programs designed to maximize profits.

Samples

Keystone will provide free samples and technical data material to you and your end users. They will be sent to you or drop shipped to your customers.

Order Processing

Distributors' orders are entered continually throughout the day and shipments are made promptly. Confirmation can be faxed to confirm items ordered, shipping quantity, and pricing. Freight carrier and tracking information is available via e-mail. We believe that providing our customers with timely and accurate information enables them to manage their business more effectively.

Marketing and Co-op Program and Assistance

Keystone offers a generous sample program; sample kits, camera ready catalogue photos, co-op allowances, rebate programs, catalogues, price lists and more.

Private Label and Container Programs

Keystone offers private label and container programs to maximize your company's profits, as well as increase your company's identity in the market and set you apart from the competition.
